Simulation Survey

Please answer the following questions.

1. Benefits to the Simulation Lab are: (Select all that apply)
   - Practice in a safe environment
   - Develop critical thinking/clinical judgment
   - Promote teamwork
   - Facilitate communication
   - Self evaluation

2. I am assigned to the role of CNA in a simulation scenario. The patient is not doing well and the blood pressure keeps falling. Based on what I learned from the Resource Center documents:
   - I need to sit and watch the nurses work
   - I need to report my findings and suggest interventions such as reevaluation
   - I need to demand to everyone in the group to step up to the plate
   - I need to pretend I don't see it

3. I will be evaluated on my performance based on
   - What my instructors’ moods are that day
   - My individual performance in a team environment
   - As if I was already a Registered Nurse

4. I am assigned to the role of Registered Nurse in a simulation scenario and do not know what to do in a situation. Based on what I learned from the Simulation Resource Center Documents I should: (Select all that apply)
   - Seek guidance from all my team members including CNAs and LPNs
   - Seek guidance from an team leader, charge nurse or peer nurse
   - Demand the physician come and tell me what to do
   - Attempt to problem solve and decision make by incorporating what I have learned in lecture with what I have seen in clinical experiences.
   - Give up and call a time out

5. Evaluation I receive from the Simulation Lab day is meant to:
   - Fail me from clinical
   - Be a guide for how I can improve clinically
   - Make me feel like I know nothing
